

Plastic Chain 5 mm Red-White

Sorfan

SKU: LA5RW

Gross Price: \$1.50

Net Price: \$1.26

Technical Specification

Attribute	Value
Dimension	5 mm
Color	Red/white
Material	Polyethylene
Weight	0,028 kg/Lfm
Shipping time	2-3 days

Description

Plastic barrier chain 5 mm red-white

Practical partitioning and effective marking of hazardous zones. This certified **PE plastic chain 5 mm** in red-white features complete UV stabilization, flexibility, and premium workmanship straight from European factories.

Thanks to premium selected polymer plastic, the product is completely resistant to solar weathering (does not fade or discolor under UV rays) and severe frost (does not crack). It perfectly coordinates with plastic barrier posts, traffic cones, or chain stands.

The price is for 1 linear meter

The chain is sold by the meter – if you add e.g. 5 pieces to the cart, you will receive 5 meters of chain in a single continuous piece. Should you require the chain to be cut into multiple pieces (e.g. 5 times 1 meter), please leave an instruction in the order notes.

Technical Specification

Link width (diameter)	5 mm
Length and packaging	package / bag 25 m
Material	High-density polyethylene (HDPE) - UV and frost resistant
Product weight	0,028 kg/Lfm
Country of origin	European Union (Italy/EU)

Intended Use and Installation Areas

- **Road and parking barriers:** Rapid marking of temporary traffic diversions, lane boundaries, and parking spaces.
- **Warehouses and factories:** Securing storage areas, walkways, and safety aisles for forklift trucks.
- **Construction sites and events:** Temporary cordoning of hazards, open excavations, and spectator management at events.

Key Advantages and Practical Benefits

- **Link diameter 5 mm:** The ideal combination of lightweight design and optimal mechanical tensile strength.

- **Manufactured in the European Union:** Production in a European facility ensures full compliance with strict quality and safety standards.
- **Packaging package / bag 25 m:** Easy transportation, quick cutting, and instant installation at the work site.
- **Complete UV and frost resistance:** The premium HDPE material will not brittle or lose its warning color under direct sunlight.
