Reflective	Yes, 2nd gen.
Base dimension	fi 300 mm
Shipping time	3-7 days

Description

U-5a post covered with 2nd generation CE foil

Ensure clear delineation of traffic islands. The professional **U-5a post covered with 2nd generation CE foil** (93.5 cm high) provides superb visibility for vertical road hazards.

The pylon holds a full CE certificate for use on public roads. The round base plate ensures stable anchoring under high wind loads.

Technical Specification

Dimensions	fi 220 mm x 935 mm/h
Weight	5 kg
Material	Polyethylene (HDPE)
Color / Pattern	Yellow

Applications

- **Pedestrian islands:** Marking the start of safety refuges at pedestrian crossings.
- **Lane dividers:** Directing traffic safely at complex junctions and diverges.
- **Hazard areas:** Warning drivers of vertical structures and road splits.

Key Advantages & Benefits

- **2nd Gen Reflective Foil:** Exceptionally high retroreflectivity for excellent night safety.
- **CE Certificate:** Meets all European requirements for passive traffic safety equipment.
- **High flexibility:** HDPE polymer absorbs impact energy, protecting vehicles and posts.
- **Highly visible:** Bold yellow and black warning stripes ({col_val}) are UV-stabilized.
