Dimension	340 mm
Color	Orange
Material	PVC
Weight	0,52 kg
Reflective	Yes
Shipping time	2-3 days

Description

Traffic cone Traffic cone 340 cm PVC reflective – professional and durable zone marking

Are you looking for a durable and reliable way to efficiently mark temporary works, cordon off traffic zones, or secure parking spaces? The traffic cone **Traffic cone 340 cm PVC reflective** with a height of **34 cm** is an indispensable safety tool. It was designed for the quick and trouble-free organization of spaces closed to traffic, such as construction pits, warehouse areas, or driving school maneuver yards. The bright orange color and the reflective stripe of the 1st generation (class R1) make the product highly visible from a great distance, providing a clear warning signal for drivers and pedestrians.

The traffic cone is made of high-quality plastic: **Flexible polyvinyl chloride (PVC)**, which guarantees its excellent performance both indoors and in challenging outdoor conditions. It is characterized by full flexibility, frost resistance, and bright orange color. The construction features optimal flexibility and resistance to mechanical damage – the cone smoothly bends under wheels and returns to its form without damaging bumpers. Additionally, the material shows high resistance to extreme temperatures and UV radiation, ensuring that the colors do not fade and the product retains its aesthetic appearance over a long time.

The lightweight yet stable construction weighing **0,5 kg** allows for easy carrying and quick deployment of multiple units at once. The specially profiled base measuring **24 x 24 cm** ensures the cone's stability even under wind gusts generated by passing vehicles. This product is widely used not only in traditional road works but also in warehouses, production halls, commercial parking lots, and during the organization of public events and sports training. It is a universal, reliable, and highly economical solution for every safety expert.
