Description

Concrete barrier "Starblok" Concrete Barrier - Road concrete class B20/25

Are you looking for a massive and extremely durable security barrier with a unique geometry? The professional **concrete barrier "starblok" concrete barrier** is a highly specialized protective element designed for demanding shoreline, port, and military applications.

Featuring a specific four-sided Starblok tetrapod shape and a weight of **1700 kg**, this product delivers unmatched stability against strong wave impact and heavy vehicle rammings. Ideal for coastal protection, NATO military bases, and high-risk mass events. We provide transport upon request (shipping is extra paid).

Production, RAL Painting and Logistics of Concrete Barriers in the EU

We are one of the largest manufacturers and distributors of concrete barriers in the EU. We supply our products to the Military (NATO forces, US and German bases), mass events (car racing, sports events), and various industries (construction sites, roadworks, warehouses, parking lots). Painted barriers significantly increase safety and visibility in work zones - we offer custom painting in any RAL color to match your requirements.

Upon request, we can organize transport for the barriers (shipping is extra paid). Unloading and placement are the customer's responsibility. It is also possible for us to organize unloading upon prior agreement – please contact us for details. We also offer flexible short-term and long-term rental plans. All transport, installation, rentals, and wholesale orders are priced individually to guarantee the best rates and attractive volume discounts. For custom specifications (painting), transport, and a tailored quote, please reach out to us via our contact page.

Technical specification

Dimensions	1495 / 1636 cm
Concrete grade	Road concrete class B20/25
Finishing / Color	Natural grey concrete
Product weight	1700 kg

Application

- **Coastal & port protection:** Preventing wave erosion and high-tide damage along shorelines.
- **Military barricades & NATO bases:** Establishing physical perimeters against heavy vehicle rammings.
- **Mass events security:** Rapidly blocking access roads during street races and public events.

Key advantages

- **Extreme weight (approx 1400-1600 kg):** Prevents unauthorized movement without heavy crane equipment.
- **Starblok tetrapod shape:** Interlocks elements cleanly under heavy wave action for coastal stability.
- **Turnkey services:** We can organize transport upon request (shipping is extra paid) and offer short/long-term rental options. Please contact us for details.
- **Heavy-duty C30/37 concrete:** Highly resistant to chemical salt environments, moisture, and deep frost.
