Description

Concrete Barrier 900 mm New Jersey - Road concrete class B20/25

Are you looking for a proven and tall barrier for lane separation or construction site protection? The robust **concrete barrier 900 mm new jersey** (900 mm height) is the professional choice for traffic control.

The specialized New Jersey shape prevents vehicles from cross-lane drifting and minimizes undercarriage damage. Made of high-strength concrete weighing **1500 kg** for uncompromising stability without permanent anchoring.

Production, RAL Painting and Logistics of Concrete Barriers in the EU

We are one of the largest manufacturers and distributors of concrete barriers in the EU. We supply our products to the Military (NATO forces, US and German bases), mass events (car racing, sports events), and various industries (construction sites, roadworks, warehouses, parking lots). Painted barriers significantly increase safety and visibility in work zones - we offer custom painting in any RAL color to match your requirements.

Upon request, we can organize transport for the barriers (shipping is extra paid). Unloading and placement are the customer's responsibility. It is also possible for us to organize unloading upon prior agreement – please contact us for details. We also offer flexible short-term and long-term rental plans. All transport, installation, rentals, and wholesale orders are priced individually to guarantee the best rates and attractive volume discounts. For custom specifications (painting), transport, and a tailored quote, please reach out to us via our contact page.

Technical specification

Dimensions	2000 x 540 x 900 mm
Concrete grade	Road concrete class B20/25
Finishing / Color	Natural grey concrete
Product weight	1500 kg

Application

- **Opposing traffic separation:** Splitting traffic streams on national roads and expressways.
- **Construction site protection:** Physical barrier protecting workers from live traffic.
- **Logistics & industrial parks:** Outlining heavy truck lanes and protective guidelines.

Key advantages

- **Tall 900 mm profile:** Significantly improves visibility and security at roadwork zones.
- **Anti-topple Jersey profile:** Sloped lower section reduces the risk of vehicle rollover upon impact.
- **Mighty self-weight:** Guarantees zero displacement under wind loads and passing truck gusts.
- **Rental & bulk deals:** Convenient renting options for construction cycles and volume discounts.
