## Description

# Heavy Concrete Planter BetonBox 120x50x75 cm | Traffic Blocker

Are you designing a representative entrance or want to protect sidewalks from illegal parking in an elegant and eco-friendly way? The large-scale **BetonBox 120x50x75** serves as a modern green barrier, replacing ugly steel bollards or U-14b concrete blocks.

The advanced technology of monolithic casting using C30/37 GRC architectural concrete provides the planter with superior flexural strength. Thanks to factory hydrophobic impregnation, the walls are highly resistant to dirt and water absorption. An integrated drainage hole in the bottom prevents waterlogging and protects plant roots.

## Technical Specification

|                       |                                                                        |
|-----------------------|------------------------------------------------------------------------|
| External dimensions   | 120 x 50 x 75 cm                                                       |
| Planter weight        | ~243 kg                                                                |
| Usable volume         | 333 L                                                                  |
| Wall thickness        | 4 cm                                                                   |
| Material              | GRC architectural concrete C30/37 (glass-fiber & zirconium reinforced) |
| Drainage hole         | Yes (integrated in the bottom)                                         |
| Impregnation          | Hydrophobic (dirt, moisture & UV resistant)                            |
| Dimensional tolerance | ±15 mm                                                                 |

## Applications

- Planting small trees:** The deep profile and capacity of {vol\_inner} liters allow healthy growth for decorative trees and large shrubs.
- Eco-friendly traffic blockers:** Massive structure of {weight} kg serves as a natural and highly aesthetic traffic separator.
- Sidewalk security:** Effective prevention of illegal parking on sidewalks and pedestrian zones surrounding modern office buildings.

## Advantages of BetonBox planters

- Impenetrable stability ({weight} kg):** Once filled with soil, the planter becomes a permanent, immovable architectural element.

- **Green barrier (eco-blocker):** Protects and secures spaces while introducing lush greenery instead of steel posts.
- **Zirconium-fiber reinforcement:** Special C30/37 concrete recipe prevents micro-cracks under the massive pressure of soil.
- **Root thermal protection:** Architectural concrete insulates roots from summer heat and winter frosts.
