Weight	300 kg
Wall thicWandstärke kness	50 mm
Shipping time	14-30 days

Description

Heavy Concrete Planter BetonBox 150x80x80 cm | Traffic Blocker

Do you need an extremely heavy, stable container for large shrubs or small decorative trees? The giant concrete planter **BetonBox 150x80x80** with an impressive weight of 472 kg guarantees unmatched stability and safety in gardens and urban spaces.

The advanced technology of monolithic casting using C30/37 GRC architectural concrete provides the planter with superior flexural strength. Thanks to factory hydrophobic impregnation, the walls are highly resistant to dirt and water absorption. An integrated drainage hole in the bottom prevents waterlogging and protects plant roots.

Technical Specification

External dimensions	150 x 80 x 80 cm
Planter weight	~472 kg
Usable volume	735 L
Wall thickness	5 cm
Material	GRC architectural concrete C30/37 (glass-fiber & zirconium reinforced)
Drainage hole	Yes (integrated in the bottom)
Impregnation	Hydrophobic (dirt, moisture & UV resistant)
Dimensional tolerance	±15 mm

Applications

- **Planting small trees:** The deep profile and capacity of {vol_inner} liters allow healthy growth for decorative trees and large shrubs.
- **Eco-friendly traffic blockers:** Massive structure of {weight} kg serves as a natural and highly aesthetic traffic separator.
- **Sidewalk security:** Effective prevention of illegal parking on sidewalks and pedestrian zones surrounding modern office buildings.

Advantages of BetonBox planters

- **Impenetrable stability ({weight} kg):** Once filled with soil, the planter becomes a permanent, immovable architectural element.

- **Green barrier (eco-blocker):** Protects and secures spaces while introducing lush greenery instead of steel posts.
- **Zirconium-fiber reinforcement:** Special C30/37 concrete recipe prevents micro-cracks under the massive pressure of soil.
- **Root thermal protection:** Architectural concrete insulates roots from summer heat and winter frosts.
